Dust extraction at its best!

The Attix 33 delivers performance and durability with a huge 30 liter capacity and available auto tool start.
The ATTIX 33 dust extractor series sets the standard for design and feature level of the Nilfisk wet & dry vacuum portfolio. With innovative filtration system, improved performance and robust design, this range represents a superior solution for professional customers looking for a safe and reliable machine. ATTIX 33 comes with more suction power, sealed dust system, automatic filter cleaning and several other user benefits - designed to meet the tough requirements in building & construction and other industries.
ATTIX 33 offers a remarkable productivity thanks to the automatic InfiniClean™ filter cleaning system. The InfiniClean™ system ensures continuous cleaning of the filter during operation using a reversed air-flow pulse, keeping suction performance on a high level. The downtime is reduced significantly, as the container can be filled up without filter maintenance – even in the most demanding fine dust applications. The washable PTFE long-life filter minimizes maintenance, reduces the overall service cost and can be removed and replaced without disassembling the vacuum!
All models offer flexible storage solutions for tools and accessories, so everything you need is at hand
